

THE COMPOSITE
SKIRTING
THAT MATCHES!

IT'S WHAT YOU'VE BEEN WAITING FOR

60% of flooring buyers prefer to purchase coordinated skirtings at the same time as their flooring. (MSI, floor coverings report, 2007).

As of yet, however, there is no solution for coordinating skirtings for **the third most common covering**, vinyl flooring (tiles, planks, and rolls), akin to the one that exists for laminated or tiled floors.

Gerflor offers you a solution with IDEM a system of skirtings that matches vinyl flooring.
