COMMITTED TO ACCESS FOR ALL

For more than a decade Gerflor has been committed to an approach integrating economic growth with environmental concerns.

Extremely committed and involved, Gerflor's Top Management team has made the environment one of its main strategic axes.

Gerflor products are 100% recyclable and all production waste is systematically recycled.

Gerflor naturally adopts a sustainable development approach taking account of both environmental and social criteria in its product development.

Providing products that give people with disabilities better accessibility to public buildings is an important aspect of this social policy.

STAIRS -TARASTE

Tarastep with contrasted stair nosing

Gerflor offers a complete range of steps with contrasted nosing for improved visibility.
Each combination provides at least 70% contrast.

• New Tarastep range

TESTIMONIAL

"The new Gerflor Tarastep range was developed in collaboration with the Accessibility Division of ARGOS-Services, part of AAAL[*] the aim being to provide a **harmonious** and **contrasting** solution that meets the needs of the market.

Going beyond aspects of comfort, aesthetics or even uniqueness, with this new range Gerflor wanted to respond to the principle of "access to all for all", as referred to in the law of 11 February 2005 promoting equal rights and opportunities, participation and citizenship for disabled people...

Consideration of levels of contrast in building environments is critical in terms of ensuring that guiding, locating, safety and visibility requirements are met in everything relating to movement by persons with visual and cognitive impairment, as well as meeting the needs of elderly people, and more broadly, of all of us ...

Use of contrasting colours as decor and design elements also provides a degree of safety, making it easier to locate obstacles and hazards, room layout and pathways. Contrasting colours help us move around and read spaces, both unknown and familiar, and improve our understanding of these spaces.

This new range of Gerflor stair coverings, developed under the expert guidance of our ARGOS-Services "Accessibility" team, is an appropriate and regulatory solution for all public premises, as well as for residential buildings."

Denis Leroy
Director of ARGOS-Services

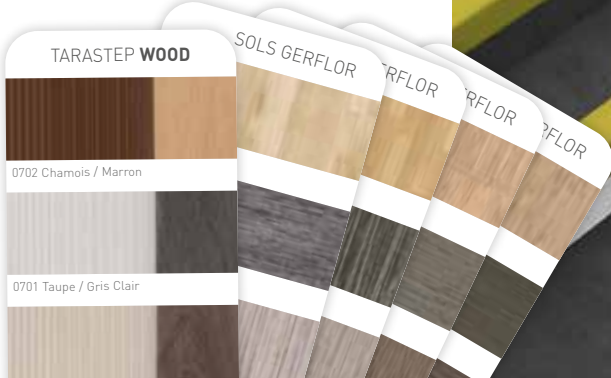

[*] Association des Aveugles et Amblyopes d'Alsace et de Lorraine, member of the Fédération des Aveugles de France (French associations for the visually impaired).

T67 ALU

- ▶ Landing/stair harmony
- ▶ Guarantees floor covering durability
- ▶ **For a state-of-the-art stair finish**
- ▶ Delivered with a black strip made out of carborandum for an improved anti-slipping action of the stair nosing.

FINISHES

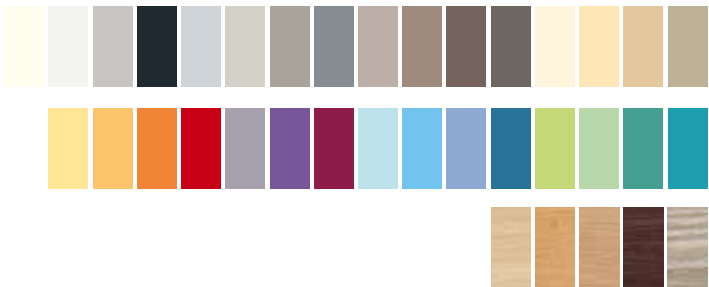

> Stair clip system

HANDRAILS

> Escort and Linea, ergonomic and durable handrails, so that visitors can move around the building in complete safety

- Options for strong visual contrast via a choice of 31 colours, and 5 wood effects.

- A dual height handrail bracket means that Escort handrails can easily be installed at two different heights, one at standard height and one for children or those using wheelchairs.

- Tactile identifiers can be added to the Escort handrail thanks to the unique design of its finishing strip that can be personalised on request.

The + : the anti-bacterial joints and exceptionally smooth design of our products allow for easy cleaning and so improved hygiene for users.

SHOWER SYSTEM

> Taradouche wet room system for people with reduced mobility

Please contact your local Gerflor representative for more information on the **Taradouche Shower System**.
