## CE MARKING

Areas of use: domestic

Diamalite is a special additive within the wear-layer that makes cleaning easier.

## LAYING

The subfloor must be smooth, clean, dry, undamaged and flat.

**Recommendations:** unroll the floorcovering 24 hours before laying.

Floor covering should not be laid in rooms at a temperature is below 15°C.

Can be installed on underfloor heating (up to 28°C).

Weld the joints (cold-treatment product) to ensure good water-tightness.

### Recommended laying methods:

- Loose laying without glue: up to 25 sq. m
- Laying without glue, with double-sided tape or hook & loop strips around the edges of the room: over 25 sq. m

**If permanent laying with glue:** use a single stick acrylic glue (approximately 250g/sq. m).

Use a finely-notched trowel.

## CLEANING & CARE

Regular cleaning with a vacuum cleaner, dust mop or a wet cloth.

**Cleaning:** with water and a neutral detergent; rinse with clean water.

**Stain removal:** White Spirit removes almost all stains.

Do not use solvents.

**Precautions:** do not use floor wax.

Avoid rubber leg caps and casters. Replace with plastic caps and polyamide casters. Protect the bases and legs of your waxed furniture with a felt disc.
