Damp sweeping equipment
Flexible mop preferably fitted with disposable, antistatic and/or pre-impregnated gauze strips

Mechanical cleaning equipment
Auto scrubber, rotocleaner or single-brush machine

Mechanical cleaning disk
3M (or equivalent) colour disks

Manual washing equipment
Disposable microfibre mop or gauze

Steam cleaning equipment
Follow the manufacturer’s recommendations

⚠️ On interlocking, removable and looselay products, don’t allow the solution to dwell.

These cleaning instructions have to be adapted depending on traffic and location of the area.

In the case of manual maintenance and to offer you the best results in terms of hygiene and appearance, Gerflor recommends that you use neutral and alkaline detergents with high wetting power (complete spreading and cleaning of the entire floor surface).

Here is a non-exhaustive list of products recommended by the main manufacturers:

- **KIEHL**: Profloor*, RS Nett**
- **TANA / WERNER**: Green care SR15*, Floor Cleaner S*, Clean Fresh®, Difotan*, Clean Extreme*, Innomat**
- **ANIOS**: Brial Clean S*, Delerganios*
- **ROCHEX**: Polystar®, Roctonic**
- **BUZIL**: HC 43**
- **Dr. SCHUTZ**: PU Reiniger**
- **ECOLAB**: Brial Clean S*
- **DIVERSEY / SEALED AIR**: Asset*
- **DREITURM**: Multinetzer*, Goldreif (green)*, Linorein**, D1 Neu**

*Neutral / **Alkaline
## STAIN REMOVAL DURING WORKS

### Paint mark removal
- Do not use abrasive cleaning equipment (e.g., Scotch Brite, scouring pads, steel wool, etc.).
- Use the solvent for the paint if known. If the solvent is not known, start with solvents such as Essence C, White Spirit, etc. before trying stronger solvents such as Taraclean spray. If the stain proves hard to remove, do not persist.
- Wipe and rinse the floor thoroughly after applying the solvent.

### On paint drips
A freeze spray will yield excellent results when paint has formed a drip on the material (freeze sprays can be bought from cleaning product manufacturers or in pharmacies).

### On adhesive marks
- Fresh acrylic adhesive marks (< 1 month)
  Apply a water-based solution with added cleaning product, leave to act and mechanically clean and rinse the floor.
- Dried acrylic adhesive marks (> 1 month)
  Use Essence C or White Spirit. Wipe and rinse the floor thoroughly after applying the solvent.
- Solvent adhesive marks
  Use strong solvents (such as Taraclean spray), but do not persist if the adhesive marks are difficult to remove (as may happen with solvent-resistant cross-linked adhesives).

## TIPS AND ADVICE FOR STAIN REMOVAL

### Rust
Apply an anti-rust product or oxalic acid. Rinse thoroughly.

### Food grease/paint/ballpoint pen/felt-tip pen/heavy grease (tar)
Apply a solvent such as Essence C or White Spirit. Rub with undiluted product and rinse with plenty of water.

### Rubber marks/Shoe marks
Apply an alkaline detergent (such as Dynatech Trophy) to shoe marks. Leave to act for 5 minutes. Rub.

### Chewing-gum
Use a freeze spray to harden the chewing gum, and then remove it with a plastic spatula (freeze sprays can be bought from cleaning product manufacturers or in pharmacies).
